Warranty Period (years): 3 years Life hours (LH): 30.000 Power Factor (PF): ≥0.5 Risk Group (RG): 0 LUNE luminaires are equipped with a rotating mechanism that allows you to change the direction of light flow, placing accents in the interior in a certain way. The internal filling of such a light source is a bright, high-tech LED that fills the space with soft and comfortable light. In addition, this lighting fixture does not dazzle — this effect is achieved due to the special location of the LED.

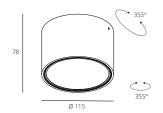

RSLC78054/7W

POLAIR series

Warranty Period (years): 3 years Life hours (LH): 30. 000 Power Factor (PF): ≥0.5 Risk Group (RG): 0 The collection of POLAIR lighting fixtures is made in the perfect white color. Thanks to the bright LEDs of the latest generation, such lamps can be used as the main light source. They are easily transformed, thus determining the direction of light flux. And they will fit perfectly into any room—both residential and public. It is harmoniously suitable for the design of classic and more modern interiors.

RSLC78063/12x1.5W

RSLC78065/10x1.5W

The surface-mounted spotlights of the QUARTE collection have a graceful body geometry. Lighting fixtures have a high level of brightness, and the height of their bodies is only 32 mm. Thanks to such compact sizes, QUARTE luminaires allow the maximum use of light flux. The lens clearly focuses the light beam, making it soft, even, and pleasant to the touch.

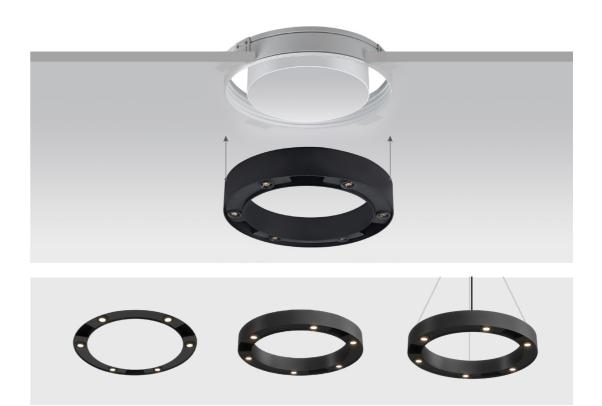

The main advantages of the line are power and brightness. The CIRCLE series of luminaires is made of durable and lightweight aluminum in black. It has 3 options for mounting and location on the ceiling, which significantly expands the range of its applications in various interior solutions. The location of the lamp can be easily adjusted to the height you need. The aesthetes prefer CIRCLE!

MW

The line of surface-mounted lighting fixtures CUNA is presented in 2 models - 5w and 10w. Their bodies are made of aluminum, and the scattering angle is quite wide at 120°. The diffused screen of the lamp obscures the light source from direct view; it creates a soft uniform illumination without the effect of glare, and also performs a decorative function.

PURE series

Warranty Period (years): 3 years Life hours (LH): 30. 000 Power Factor (PF): ≥ 0.9 Risk Group (RG): 0

RDLC79031/10W

RDLC79032/20W

The lamp of the PURE series differs in the class of protection of IP44, which allows the use of such a model in rooms with an increased level of humidity. The device is made of highquality aluminum, so it is not subject to corrosion. The strong metal case of a cylindrical form guarantees long service life. Classic colors, compact size and restrained design make the model versatile and practical. It is ideal for lighting residential buildings and offices. The model generates a directed stream of light with a wide scattering angle of 80°, which allows you to use the device as the main light.

Lighting fixtures from the POINT series create the effect of natural light. Soft white light can act as an additional source of illumination. This lamp focuses on individual interior items. The body of the product is made in a classic rounded shape. Lighting fixtures from the POINT collection are suitable for both private and public spaces.

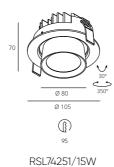

TUBO series

Warranty Period (years): 3 years Life hours (LH): 30. 000 Power Factor (PF): ≥0.5 Risk Group (RG): 0

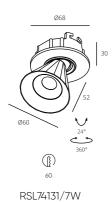

The TUBO series of built-in spotlights will perfectly cope with both general and additional lighting. This rotary model is built into any type of ceiling. However, protection class IP20 requires it to be installed only indoors with a normal level of humidity. It is available in two colors: white and black and gold and black. This lighting fixture will be a universal solution for modern interiors created in the spirit of minimalism.

Warranty Period (years): 3 years Life hours (LH): 30. 000 Power Factor (PF): ≥0.5 Risk Group (RG): 0

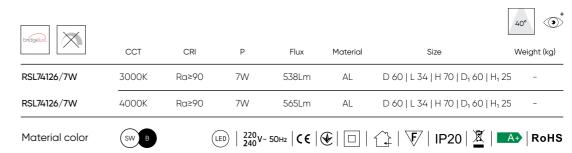

The DAMY line of built-in luminaires provides spaces with a powerful and high-quality light flux with neutral and warm light. This lamp will look organic in art spaces, showrooms, shops, exhibitions, and shopping centers, as well as in residential areas. Its body is made of aluminum, and the device itself is painted in a classic black color. Luminous flux with a recoil of 505–530Lm is generated by built-in diodes with high radiation density. The DAMY series spotlights have a power rating of 7W.

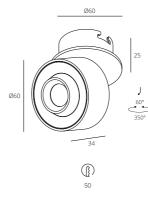

MAYI series

Warranty Period (years): 3 years Life hours (LH): 30.000 Power Factor (PF): ≥0.5 Risk Group (RG): 0

RSL74126/7W

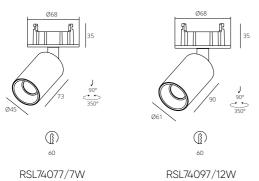

The body of the MAYI luminaire has a modern design, so such luminaires will fit organically into the interior in the style of minimalism, loft, or high-tech. The rotating spot, which is equipped with this model, allows you to change the direction of light and correctly place the accents in the room. Thanks to the bright technological LEDs of the new generation, such a light source can be used as the main one.

REM is a unique collection of recessed luminaires in black and white. It is used to create accent lighting. This model with a built-in LED has a power of 7W and 12W and also provides a bright light flux, filling the space with diffused light. Despite the increased brightness, this light source is not irritating to the eyes and remains comfortable for long periods of

CINI series

Material color

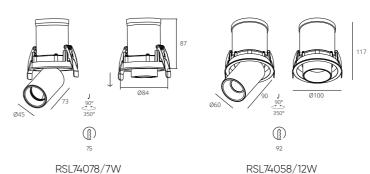

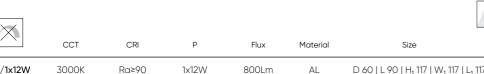

Warranty Period (years): 3 years Life hours (LH): 30. 000 Power Factor (PF): ≥0.5 Risk Group (RG): 0

CINI luminaires are available in two capacities: 7W and 12W. A distinctive element of this collection is the spot, which is "hidden" inside the built-in structure. The body of the CINI luminaire is made of durable aluminum, and high-tech, high-brightness LEDs are used as the interior filling, which makes it possible to use the luminaire as the main light source. Thanks to the rotary mechanism, the direction of light flux is easily changed.

The EVA collection consists of built-in linear luminaires for directional lighting. The frameless design used in this luminaire makes it more elegant and light, and allows you to precisely direct the light flux. Each lens is recessed and separated from neighboring reflectors by a black frame. In addition, this color reduces the number and intensity of flashes. Due to this, the lighting is the most comfortable for perception.

LISE is a series of built-in linear luminaires. It is presented in three different models: to create directional light, diffused light, and to illuminate the walls. Installation of such a product with a decora tive frame advantageously hides all possible unevenness of installation.

The SOLIS series of hanging lamps is a combination of modernity and functionality. The model is presented in two colors — white and gray-green. Such a lamp integrates into any modern interior. The structure has the shape of a circle with a diameter of 500 mm and 650 mm. The lighting device creates a powerful light stream with a high color rendering index (>90Ra). Designed for use in an alternating current network with a nominal voltage of 220V.

RHL7755/5W

The simple but very stylish NILE series perfectly integrates into any modern interior of spacious studio apartments, kitchens, and bedrooms, and will also look good in the living room. The lamp is made of metal and painted in black and white and brown and white. You can adjust the height of its structure yourself with the help of a wire. The lamp is equipped with a LED – a high-quality and safe light source that does not radiate ultraviolet and infrared rays and does not flicker during operation. The power of the lamp is 5W, and it is designed for operation in an alternating current network with a nominal voltage of 220V.

The STRING suspension series is perfect for implementing modern design projects. Such a model will fill the room with warm white light, which contributes to the creation of a comfortable and cozy atmosphere. It is necessary to pay attention to the height of the ceilings when lamps are used in home spaces because they should be higher than 2.7 m. The simple design and elegant shape create a special atmosphere. The light source is built-in LEDs. They provide good lighting with low power consumption.

RHL7778/15W

Hanging luminaires in the cylindrical bodies of the TUBO series are a choice in favor of high-quality and non-standard lighting scenarios. The light source built into the body provides a high level of visual comfort and eliminates the dazzling effect. A lens is used instead of the usual reflector. It allows you to create a more directional and powerful light flux and provides brighter lighting of the space with less energy consumption. The suspension system is adjustable in length, so you can easily adjust it to the parameters of your room.

The KELLY series floor lamps will delight you not only with their design but also with their high-quality lighting. Modern LEDs were used as inlay filling. The light from them is pleasant to the eyes, not annoying, and does not cause fatigue. Also, LEDs consume little electricity and give a powerful, bright luminous flux. The floor lamp is made of metal and glass.

KOS series

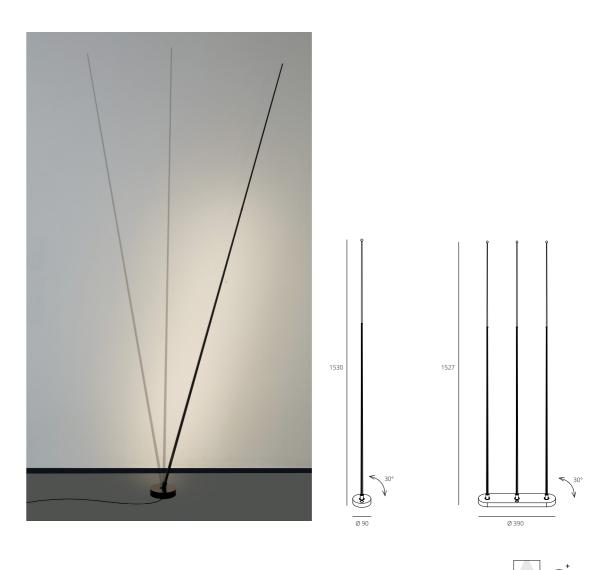

Warranty Period (years): 3 years Life hours (LH): 30. 000 Power Factor (PF): ≥ 0.4 Risk Group (RG): 0

The floor lamp of the KOS line is intended for the creation of decorative lighting. This model is equipped with a rotating structure that allows you to change the angle of the light part, directing light at individual objects located in space. The model is presented in an exquisite black color.

RWLB112/6W

The clear geometric shape, minimalist design and the absence of unnecessary elements make the lamps of this collection ideal for creating interiors in a modern style. Their bodies are made of strong and environmentally friendly aluminum. The warm white light is scattered around the perimeter and creates a unique effect, so the products from the LILE series are a great option for decorative lighting!

DIANA series

Warranty Period (years): 3 years Life hours (LH): 30. 000 Power Factor (PF): ≥0.5 Risk Group (RG): 0

RWLB109/7W

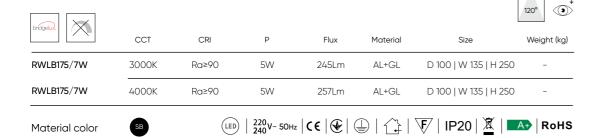

RWLB110/7W

The DIANA series is available in black and white. The design of the body has a unique bionic shape, and the luminous flux of the model is scattered upwards. A high-tech LED was used as the internal filling. Models of this line are a great option for decorative lighting! Warm and comfortable white light allows you to successfully use products for interior design of different styles.

KELLY series

Warranty Period (years): 3 years Life hours (LH): 30. 000 Power Factor (PF): ≥ 0.5 Risk Group (RG): 0

Material color

RWLB175/7W

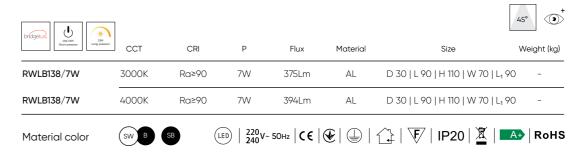

The KELLY series of wall lamps will come in handy when you need to illuminate certain details in the interior and pieces of furniture, and divide the space into different light zones. It will be appropriate in the kitchen, in hallways and corridors, as well as on non-residential pre-mises. It is made of metal and glass. The design is small and consists of a base and a diffuser of white light. The light source is LEDs, with a total power of 7W.

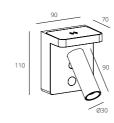

OTTO series

Warranty Period (years): 3 years Life hours (LH): 30. 000 Power Factor (PF): ≥ 0.5 Risk Group (RG): 0

RWLB138/7W

The OTTO wall-mounted lighting device can fulfill any design task regarding creating a unique and original interior. It performs two functions: decorative and practical. Illumination will provide a light level that is comfortable for the eyes, will create accents in the space, and will divide the space into different light zones. The lamp is made of metal, painted in black and white and black. The light source is LEDs, with a total power of 7W. The switch is located on the body.

Warranty Period (years): 3 years Life hours (LH): 30. 000 Risk Group (RG): 0

The street lamps of the PLIS series have an attractive geometric design. It has a durable black coating, an IP54 protection rating, and is made of glass and metal. Built-in LEDs serve as the source of light. Warm-toned light flux is produced by LEDs. Lamp power: 3W. The lamp can be lit or shut off with a short press, and dimmed with a long press.

RTD3001/3W

The design of the lamp includes wireless charging, which can power devices.

INEL series

Warranty Period (years): 3 years Life hours (LH): 30. 000 Power Factor (PF): ≥0.5 Risk Group (RG): 0

Material color

INEL series street lamp with IP54 level of protection against moisture and dust. It has a minimalist design and thin construction, thanks to which it blends harmoniously with the surrounding land-scape. It provides diffused lighting and performs a decorative function. The design is made of aluminum with a reliable black coating and plastic (the light part). 12V connection. It is located along the garden paths and driveways, in front of the entrance group. The lamp is equipped with a special spike for easy installation on the ground. This lamp tolerates any weather conditions well. It has special protection against penetration of moisture, water, and solid foreign particles into the body (IP54).

The street lamp of the REDO series has a simple geometric shape. It is made of aluminum and has a reliable black coating and an IP65 protection class. The model is designed to illuminate the land plot. It can be installed near the entrance area, along garden paths, near gazebos, and in recreation areas. The light source is built-in LEDs. Such lighting provides good light with minimal electricity consumption.

The KREIS series street lighting features a simple, practical design. It is made of metal and complies with IP65 requirements, meaning it is highly protected from moisture and dust. This collection completes housing sealing and has resilience to environmental factors like moisture, UV radiation, and temperature variations. It features a solid coating that is resistant to cracking and aging.

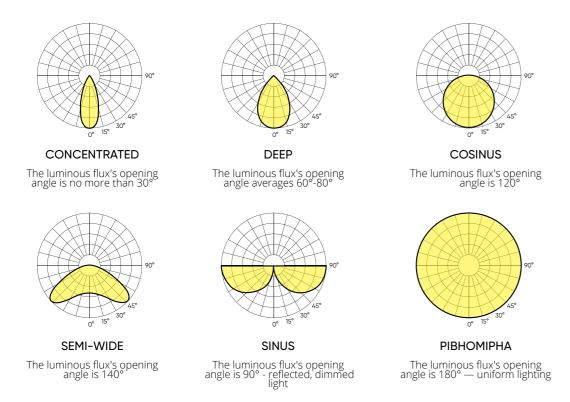

TECHNICAL

LIGHT DISTRIBUTION IN SPACE

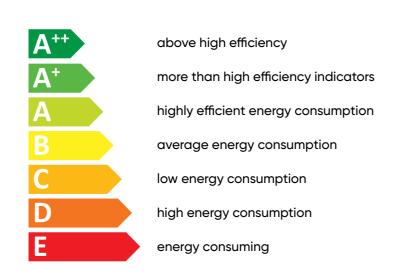

LIGHT CURVE GRAPH

A ray of light falling on the surface forms a circle. At its center – the highest intensity of light flux – and at its borders, the saturation is about 10% of the maximum. The angle of incidence of light from 10° to 40° is most often used as accent lighting. It allows you to focus light on a specific object, thereby highlighting the individual details of the interior. Lighting devices with a wide angle (from 45° to 90°) of light propagate uniform light and therefore are considered universal for the main lighting of the room. In large rooms, direct and diffused light fixtures with an angle of 90° or more are used.

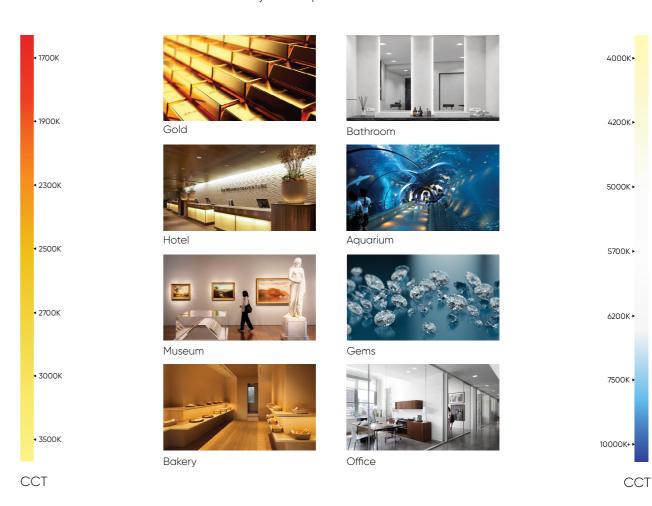

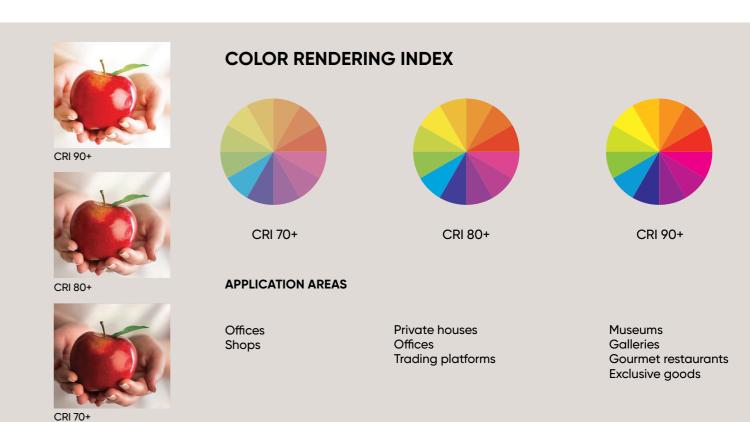

ENERGY EFFICIENCY CLASSES

RULES FOR APPLYING CORRELATED COLOR TEMPERATURE

Any space needs the appropriate color temperature because it emphasizes the uniqueness of the room and individual items as well as the individuality of the space itself.
